CHEMINÉES PHILIPPE

ORIGINS

Cheminees Philippe honours the beauty of fire with a vision and philosophy to create luxury fireplaces. Appreciated for their unique and beautiful craftsmanship and excellent heating ability, Cheminees Philippe are celebrated for inventing the world's first dual opening fireplace.

Since the formation of the company over 60 years ago, they uphold a strong policy in investment and diversification, specialising in radiant heat technology, design and functionality.

Firmly established in the Pas-de-Calais region of France, on more than 100,000 square metres and employing more than 1000 people, they completely manage the entire production and distribution of their products to more than 30 countries worldwide.

Cheminees Philippe remains at the forefront of modern hearth design, dedicated to offering a diverse range of perfectly designed heating solutions for residential and commercial spaces.

In this catalogue, stunning bespoke designs lay at the heart of every Cheminees Philippe project, offering an aesthetic expression of comfort and luxury at the architectural heart of the living room.

PROUD HERITAGE

Designers of the World's 1st dual opening fireplace over 60 years ago, Cheminees Philippe is highly respected for their innovative, durable and quality heating solutions. The entire production process of each and every model is carried out in-house by their team of skilled craftsmen in their foundry and advanced manufacturing facility, distributing to over 30 countries worldwide.

ATTENTION TO DETAIL

Known for their quality craftsmanship, every Cheminees Philippe is superbly crafted. Offering excellent damper and air control to manipulate and adjust the burn rate and heat as you need; easy door opening and closing mechanisms; panoramic glass doors (heat resistant to 800° C) offering superb views of the dancing flames and convenient access to ash pan and grate for easy cleaning.

BEST OF BOTH WORLDS

Enjoy the advantages of efficient, energy saving slow combustion heating coupled with real open fire enjoyment, by simply gliding the firebox door up or down. Unique cast iron transmission fins create a powerful heat exchange and a dual combustion heating system produces both radiant and natural convection for maximum heat.

HEATING SOLUTIONS & DESIGN

Cheminees Philippe's diverse range of fireplaces are revered for their uniqueness and excellent heating ability, emitting a natural warmth capable of heating small to large open spaces. Their large selection of single, multiview and freestanding designer fireboxes provide versatile options to integrate into any new architecturally designed space, renovation or refurbishment of an existing fireplace.

SETTING THE BENCHMARK

For more than 38 years, Cheminees Philippe Australia has set the benchmark in Australian modern hearth design, collaborating with our top architects and designers to create stunning hearth designs for architectural, award winning and celebrated homes.

BUILDING OR RENOVATING

For any residential or commercial project, new build, renovation or makeover, we can advise you on the most suitable Cheminees Philippe to perfectly integrate into your living space, creating a value added feature of uniqueness, beauty and practicality, you're guaranteed to love.

ENVIRONMENTALLY CONSCIOUS

Dedicated to research and development, Cheminees Philippe takes their responsibility to our planet seriously, producing environmentally friendly products with a strong commitment to air quality, and energy efficiency, with all fireboxes conforming to the latest Australian standards (AS/NZS 4012/4013).

WARRANTY

We provide genuine spare parts to all our products and offer a 10 year guarantee. Please consult your dealer for terms and conditions.

RADIANTE SINGLE FRONTED WOOD FIREPLACES

Cheminees Philippe have been pioneering and perfecting their range of cast iron fireplaces to bring you an impressive collection of unmistakable quality and style. A popular architectural design piece, Cheminees Philippe offers a new approach to fireplace design by leaving the firebox completely exposed to create a dramatic statement piece or installed into a masonry chimney to create a more traditional hearth design. The large range of single fronted fireplaces will integrate perfectly into any residential or commercial venue and come in a range of sizes and heat outputs to suit small to large open planned living spaces.

RADIANTE / 600 PRIMO

Embrace your home with the ambience and warmth of this timeless fireplace crafted in the true French tradition. The Radiante 600 Primo will blend seamlessly into its surroundings. Its generous and beautifully crafted cast iron firebox will distribute excellent heat, whilst the big glass viewing window will give maximum flame enjoyment. The perfect complement to any new creative hearth project or refurbishment be it modern or traditional.

RADIANTE

TRIPLE + FOUR SIDED WOOD FIREPLACES

A combination of robust craftsmanship and refined style, Cheminees Philippe's triple sided and four sided fireplaces put an elegant spin on traditional fireplace design. Frequently used as a centrepiece with all the hallmarks and qualities of a stunning focal point, plus the added bonus of superb warmth and ambience. The open silhouette of these multiview fireplaces plays a key role in today's modern hearth creations with their honest design, often celebrated and not hidden.

RADIANTE / 700 3V

Making memories starts with something special and the three sided fireplace is a stunner, anyway you look at it. Cutting edge design and artistry goes into the making of the sophisticated Radiante 700 3V, in which every component is meticulously fashioned to offer a fireplace that not only looks beautiful but has superb heating capabilities. Marvel at the attention to detail of this classic dual opening fireplace and all its attributes to add a romantic backdrop to any home.

RADIANTE FREESTANDING SERIES

Add a natural aesthetic statement to a room with the bold angular designs and balanced form of Cheminees Philippe's freestanding fireplaces. These robust beautifully crafted, fireplaces have great design merit for any style of home and are the perfect choice for high ceiling warehouse style rooms and in front of large windows with panoramic views. Made of pure cast iron the fireboxes radiate a steady and impressive warmth, with additional heat generated from the exposed flue. Versatile and bold, these freestanding fireplaces will make the perfect feature in any inner city or rural setting.

HORAMA

Designed to outlast trends the understated style of the Horama sets the perfect stage for beautiful fireside solutions. Boasting a finely crafted, durable cast iron body in a minimalist style, it's a powerful performer delivering a super-efficient, slow combustion radiant warmth and an irresistible, glorious flame through its impressive wide glass door. With bold aesthetics, the Horama knows how to sit on the hearth with soul and style.

ROTATING
BASE

I can still recall my first impression of a Cheminées Philippe fireplace. It was not in fact as one normally sees it imbedded in a wall in somebody's living room, but in fact it was browsing through technical literature and seeing the magnificent structure that the entire fireplace actually is. It appears so very French in its wonderful quilted cast iron and its very French guillotine process that operates the door on many models. I was transfixed by its technology that seemed somehow ancient but also very contemporary and in our first use of it, exposed it utterly and designed a whole wall around the revealing of this remarkable piece of French industrial design.

Ever since then we've never tended to conceal these fireplaces but expose them in their complete operation in full view in many living rooms over many projects. In some they even take centre place with a steel surround that we designed that finds a common language between our architectural response to a specific project and the powerful aesthetic of these remarkable fireplaces.

It's been a long term relationship and continues, the latest being in my own home here in Melbourne.

John Wardle - Architect
